valve performance

Some of the main

cause for this code

condition is when the

EVAP check valve fails

to perform, The most

common fix is the

replacement of the

EVAP check valve.

common trouble code with any vehicle, that includes the Ford Fusion. It's an OBD2 code and stands for:

P0304: Misfire

Detected → Cylinder 4.

P0304 is certainly a cause for concern, and should be considered a threat to the drivability of your Fusion.
