How-to-guides - Understanding relays
I just bought a bunch of 12V relays for
some, auto-related uses (alarms, horns,
etc.). Well, I need to know the wiring
diagram, or more simply what wire goes
with what. For instance, I want to add a
new horn relay, using a switch, when
grounded, will activate the main, fused
12V lead from the battery to supply 12V
to the horns.
