~~ENGINE CONTROL (4A-FE) CelicaTech~~

The image below shows what I salvaged for the original 7A engine harness to splice into the 3B harness. It is primarily those 4 connectors that are in the driver's side footwell area, the t5/t10 connector that goes into the auxilliary panel and the t9 (not used). It was then just studying wiring diagrams and splicing things together.

~~6. ECU Pinout 1/2 Wiring Harness Series~~

The ECU is the very heart of your engine management system. Almost everything under the bonnet, and a lot of the stuff inside the car, connects to it in some way. When things start going wrong, it's essential to check that signals are getting to or coming from the ECU, and that means testing the wiring.

Look just below/behind distributor, to the back of the engine (a light helps here), and you'll see where a long metal breather tube (runs transverse across engine bay and behind engine) connects to the rubber breather hose. To disconnect the two, first loosen the mounting bolt that holds the metal tube behind the engine block.
