The ladder logic program is stored in an industrial microprocessor called a PLC Programmable Logic Controller. The actual PLC ladder logic programming code looks like a relay logic electrical schematic drawing. There are various PLC programming languages used in industrial automation, but the most popular is PLC ladder logic.

~~Programming Allen Bradley SLC 500 ControlLogix PLC intro~~

In an Allen Bradley PLC they are called Latch and Unlatch instructions. These instructions simulate the function of an electromechanical latching relay. Advantages include flexibility in programming because the Set (Latch) and Reset (Unlatch) symbols do not need to be in the same rung.

~~Chapter 2: Basic Ladder Logic Programming~~

Here are some of the commonly known differences in ladder logic symbols: SET/RESET or LATCH/UNLATCH While in a Siemens PLC this is called the SET/RESET function and the symbols are similar to the above, other PLC brands can use another variation of this function. Allen Bradley and some others call the function LATCH/UNLATCH and use slightly different symbols.
