through The MV7000 provides incoming power loss ride-through and keeps the process running without tripping. Under-voltage operation The MV7000 operates continuously and provides power to the motor at a lower input supply voltage (down to 70% of nominal voltage). Flying start into a

GE Grid Solutions

The electronic circuits of ALSTOM Grid are immune to the relevant levels of electrostatic discharge when housed in their cases. Do not expose them to the risk of damage by withdrawing modules unnecessarily. Each module incorporates the highest practicable protection for its semiconductor devices. However, if it becomes necessary to withdraw a
