Players race each other to be the first to place all of their wooden animals upon the animal pile before any of the other players. A roll of the die tells the players how many animals can be placed or whether they can add to the alligator base. This game fosters hand-eye coordination and fine motor skills.

Animal Upon Animal Game - HABA USA

Animal roleplay is a form of roleplay where at least one participant plays the part of a non-human animal.As with most forms of roleplay, its uses include play and psychodrama.. Animal roleplay may also be found in BDSM contexts, where an individual may take part in a dominant/submissive relationship by being treated as an animal. The activity is often referred to as petplay.

Animal roleplay - Wikipedia

Five surprising animals that play A captive crocodile gives his female partner a piggyback ride. Crocs are just one of the many animals in which scientists have documented playful behaviors.

Five surprising animals that play | Science News

Play behavior can vary so much; animals need to be able to tell when something is play rather than real aggression or a mating display. For example, chimpanzees have something called a “play face,” a nd dogs do something called a “ rump bow” — rump high in the air with forelimbs pressed into the ground.“

Which animals play, and why? — WHY?

Many animals in captivity that haven't a partner to play with or maybe that play in non-natural conditions are deprived of establishing healthy relations with other conspecifics and incapacitated for living in their original environmen t (to know more about animal captivity, you can take a look to these two entries about marine mammals in ...
