### Bad Programming Practices 101 | SpringerLink

Signs that you are a mediocre programmer 1. Inability to think in sets. Transitioning from imperative programming to functional and declarative programming will immediately require you to think about operating on sets of data as your primitive, not scalar values. The transition is required whenever you use SQL with a relational database (and not as an object store), whenever you design programs ...

### Signs that you're a bad programmer - Software Engineering Tips

As a programmer, I've seen a lot of poor practices, not just around code, but also around teamwork skills. I've been guilty of practicing many of these bad habits myself. Here are my top 35 bad programming habits, organized into four categories: code organization, teamwork, writing code, and testing and maintenance.

10 Bad Coding Practices That Wreck Software Development Projects Most of the time, software developers do the right thing. On those rare occasions when they don't, bad things can happen.

### 10 Bad Coding Practices That Wreck Software Development ...

Being of the opinion that there is no point in listing the good programming practices (which have been discussed ad-nauseam by computer scholars, project leaders and Quality Assurance Groups) I only wish to list the bad coding practices which I have experienced or heard so far. Most of the discussion here is limited to C,C++ programming.
