If you want to measure deeply in your D-jetronic, you will need a multimeter. While all Bosch workshop manuals recommend the Bosch EFAW 228, I can calm you down that you do not have to spend up to 1000€ for such a tool. The EFAW 228 is nothing but a multimeter for measuring voltage or resistor plus a switch to activate your fuel pump permanently.

lubrication, the exact orientation, little effort Do not forget, it works up to 80PSI (6 bar) fuel pressure

Repair the Bosch Fuel Distributor -- how to install the plunger
I have been working in the motor trade for almost 10 years years now, and have been working with Kjetronic for 8 of them. Most of the information I will use comes from course notes I have from attending the Ford Service Training College at Daventry on the Bosch Kjetronic fuel injection system training course.
