## 14.2 PARKING DESIGN CONSIDERATIONS

Car lifts replace the conventional ramp system for access to the parking place. Mechanised parking systems can be incorporated in a parking place as long as they meet the requirements stipulated in the Rules. QPs must give due consideration to the safety of motorists, pedestrians and vehicles in the design of mechanical parking

Urban Design Guidelines - Resources  
Optimisation of car-park designs Figure 1: An example of a basement car park plan. Plans for new urban developments (blocks of flats, offices etc.) very often include integrated basement car parks. The value of each car-parking space is very high indeed | perhaps \$100k in central London, although a more typical figure across the UK is \$15k.

A Six-Step Guide to Parking Lot Design  
Access to quality parking is one of the foundational needs of commercial America. Thanks to the services that well-constructed parking lots provide, businesses can strive for goals while giving vehicular access to employees and customers — without the added obstacle and stress that poorly designed parking facilities tend to cause.
