Samacheer Kalvi 11th Physics Book Solutions Answers Guide

This is Giancoli Answers with Mr. Dychko. Let's begin the solution by dividing this diameter by 2 to get the radius since the radius is what we are gonna use in our centripetal acceleration formulas. So 35 centimeters divided by two 17.5 centimeters and then we'll convert that into meters because we always want meters, kilograms, seconds, those types of units, mks units, for our formulas.
