The title of this meeting is Cognitive Technology: Instruments of Mind. In this paper, we try to characterize the ways that the instruments of our minds are compromised by the restrictions that our bodies and physical environment place on them. This can be regarded as a proposed approach to the study and practice of cognitive ergonomics.

Cognitive Theory - an overview | ScienceDirect Topics
In philosophy of mind, the extended mind thesis (EMT) says that the mind does not exclusively reside in the brain or even the body, but extends into the physical world. The EMT proposes that some objects in the external environment can be part of a cognitive process and in that way function as extensions of the mind itself. Examples of such objects are written calculations, a diary, or a PC ...

Abstract. This paper discusses the tool aspect of the cognitive artifacts often referred to as 'instruments of mind'. Having established the basic distinction between tool and instrument, the authors then go on to review the notion of artifact itself, and discuss the potential for mind change that is inherent in the use of 'mental' instruments such as the computer.
