conceptual physics chapter 7: Energy study guide by Waverly_V includes 89 questions covering vocabulary, terms and more. Quizlet flashcards, activities and games help you improve your grades.

Conceptual Physics Chapter 7 Energy

Energy cannot be created or destroyed; it may be transformed from one form into another, but the total amount of energy never changes. Machine A device, such as a lever or pulley, that increases a force or simply changes the direction of the force.

Conceptual Physics Chapter 7 Energy Flashcards | Quizlet

Conceptual Physics--Chapter 7: Energy. Energy that a body possesses because of its position in a gravitational field. On Earth, potential energy (PE) equals mass (m) times the acceleration due to gravity (g) times height (h) from a reference level such as the Earth's surface. $PE = mgh$.
