Specific practice areas. Construction law builds upon general legal principles and methodologies and incorporates the regulatory framework (including security of payment, planning, environmental and building regulations); contract methodologies and selection (including traditional and alternative forms of contracting); subcontract issues; causes of action, and liability, arising in contract, negligence and on other grounds; insurance and performance security; dispute resolution and avoidance.

## **Construction law - Wikipedia**

The law affecting the competitive process of bidding or tendering for a construction project was a sleepy legal backwater in Canada for at least a century or so - until 1981. A decision of the Supreme Court of Canada in that year turned things upside down and was followed by a flood of litigation, which now seems to be subsiding.
