In my research and
talking with others that

File Type PDF Conversion Kit Instructions John

have worked on these for decades, the best kits are the ones that come with

Nippondenso starters. They last the longest and are also the more expensive kits. The part number on this kit is A-TS-8000 and is available from multiple sources such as John Deere, A&I Products and a few others.

The whole design is

cringe worthy and

looks like a disaster

waiting to happen in

my opinion. I was

File Type PDF Conversion Kit Instructions John

happy to see a conversion kit to the traditional spin-on oil filter with an oil drain pipe and 2 qts. of John Deere oil was available. The kit is half the price of one those terrible easy/quick change oil filters.
