*The Case for Cycles - Cycles Research Institute*

An exact science like astronomy can usually make very accurate predictions indeed. A chemist makes a precise prediction every time he writes a formula. The nuclear physicist advertised to the world, in the atomic bomb, how man can deal with entities so small that they are completely beyond the realm of sense perception, yet make predictions astonishing in their accuracy and significance.

*Cycles The Science of Prediction by Edward R. Dewey ...*

[Cycles: The Science of Prediction] is not a scientific book: the evidence underlying the stated conclusions is not presented in full; data graphed are not identified so that someone else could reproduce them; the techniques employed are nowhere described in detail. [...] Its closest analogue is the modern high-power advertisement—here of book length and designed to sell an esoteric and supposedly scientific product.

*9781614270058: Cycles: The Science of Prediction ...*

When we examine a series of figures for the possible presence of rhythmic cycles we are free to select any cycle length that fits the fluctuation. With 100 years of figures, let us say, we are free to choose any cycle length from two years (50 repetitions) to 50 years (two repetitions).

*Cycles The Science Of Prediction*

In 1947 Edward R. Dewey and Edwin F. Dakin published their book Cycles: The Science of Prediction which argued the United States economy was driven by four cycles of different length. Dewey devoted his life to the study of cycles, claiming that "everything that has been studied has been found to have cycles present."
