**Db2 for z/OS & Tools – The World of DB2**

the Db2 Tools Product Documentation page. October 1 1, 2019 edition This edition applies to Version 3 Release 2 of Db2 Cloning Tool for z/OS (product number 5655-N15) and to all subsequent releases and modifications until otherwise indicated in new editions.

**Robert's Db2 blog: DB2 for z/OS: Clone Tables and "Active"**

The cloned Db2 subsystem can be accessed from the same z/OS® system. This increases productivity in several ways: Significantly reduces production online downtime and the costs associated with cloning a Db2 subsystem with traditional tools.

**5655-591 IBM Db2 Cloning Tools for z/OS, V2.2**

IBM® IMS™ Cloning Tool for z/OS® makes it easy for you to quickly clone IMS subsystems and databases to increase data availability. By using fast copy technology combined with automation and reduced manual efforts, the IMS Cloning Tool helps increase productivity and significantly decrease production online downtime and the costs of creating an exact copy or cloning an IMS subsystem and ...

**Db2 Cloning Tool V3.2 – What does Db2 Cloning Tool do?**

viii SAP on DB2 for z/OS and OS/390: DB2 System Cloning Jan Baisden is a Senior Market Support Representative at the International Technical Support Organization, Poughkeepsie Center. He concentrates on ERP solutions and particularly on AIX support of S/390 usages in those solutions.

**SAP on DB2 for z/OS and OS/390: DB2 System Cloning**

This IBM Redbooks publication shows the different techniques customers can use to clone their DB2 system. Although the scenarios in the book use an SAP workload, the DB2 cloning techniques we describe are not specific to SAP. Those techniques can apply to any DB2 system and the applications running on that DB2.

**IDUG – Forums – DB2 10 z/OS – Clone Tables Practical Lessons**

CLONE Tables [DB2 9 for z/OS] This new feature in DB2 V9 might sound like an old monster movie (Invasion of the Clone Tables!!!), but it is actually a nifty new capability for managing DB2 data availability. Cloning is basically a method of entirely refreshing all of the rows of a table while maintaining availability to the table.

**DB2 10 – Administration – Creating a clone table**

Skeleton cloning is a subset of features provided by the IBM Db2 Cloning Tool.

**IDUG – Forums – DB2 Cloning Tool for z/OS**

RUNSTATS does not collect statistics on a clone table, and Access Path Selection (APS) does not use RUNSTATS statistics when accessing a clone table. This is in contrast to real-time statistics, which keeps statistics for both the base and clone objects. Also, autonomic statistics are not collected on a clone table.

**Db2 Skeleton Cloning – IBM Redbooks**

IBM DB2 Cloning Tool for z/OS, V2.2 (5655-591) makes it easier to clone a DB2 subsystem or DB2 table spaces very quickly. DB2 Cloning Tool can also be used to clone non-DB2 volumes.

**Cloning – What's new and faster? – SEGUS**

Subject: RE:[db2-l] db2 z/os clone question We use BCV5 from UBS-Hainer to clone data from our production to our integration environment (actually we use DB2 for z/OS V8 NFM). With this tool we could reduce the CPU time about 90 to 95 percent (compare with the normal DB2 UNLOAD/LOAD process).

**SAP on DB2 for z/OS and OS/390: DB2 System Cloning | IBM ...**

From: DB2 Data Base Discussion List [mailto:[login to unmask email]] On Behalf Of Jorg Lueke Sent: Thursday, June 26, 2008 2:42 PM To: [login to unmask email] Subject: [DB2-L] DB2 Cloning Tool for z/OS Is anyone using this? Any experiences to report? We are thinking about replicating our production data into a test environment

**DB2 z/OS Cloning – SEGUS**

A DB2 for z/OS DBA contacted me a few days ago and posed a seemingly simple question, the answer to which ended up being a little more involved than might be expected. The DBA's query: how can one alter a table that has a clone? The specific need in this case was to add a column to a table for which a clone had been created.

**The Db2 Portal Blog: CLONE Tables [DB2 9 for z/OS]**

□Cloning DB2 systems isn't rocket science, but a complex and error-prone process. □Familiarize yourself with these procedures and define an easy-to-use step-by-step guide.

**Cloning – What's new and faster? – SOFTWARE ENGINEERING**

IBM Db2® for z/OS® is well known as the gold-standard information steward. Deep synergy with the z/OS operating system and System Z platform provides support for the highest transaction volumes with the ultimate levels of availability. Db2 Skeleton Cloning: Protecting Your Production Environment | IBM Redbooks

**IBM Db2 Cloning Tool for z/OS – Overview – United States**

Enhancements to the IBM Db2 Cloning Tool for z/OS If you are a Db2 for z/OS Cloning Tool user, you'll want to learn about the latest enhancements for performance, availability and usability.

**Db2 Skeleton Cloning: Protecting Your Production ...**

If both, source and target are one and the same OS and database type (e.g. DB2 z/OS ÆEDB2 z/OS) ÆHomogeneous System Copy (aka. HSC) BTW If the target is different (e.g. DB2 LUW ÆEDB2 z/OS) ÆHeterogeneous System Copy (not addressed today)

**IMS Cloning Tool for z/OS – Overview – United States**

Betreff: [DB2-L] - RE: DB2 10 z/OS - Clone Tables Practical Lessons It's a drain so there will have to be no readers at the time of the exchange. I invented a work around that doesn't involve close tables. In DB2 11 for z/OS you can do a LOAD SHRLEVEL CHANGE. I haven't tried this yet, but it will also do a drain.

**Db2 Cloning Tool User's Guide**

Cloning DB2 objects isn't rocket science, but there are some specialties to take care of Familiarize yourself with these procedures and define an easy-to-use step-by-step guide. Tools that supervise, manage and optimize cloning lead to • More flexibility • Higher degree of automation

**db2-z/os-clone-question – Tech**

Cloning a DB2 for z/OS Database. You can clone your existing Siebel database to a target database. The DB2 system cloning process involves the following steps: Extracting a Storage Control File from the DB2 Catalog. Extract a storage control file from the existing Siebel Schema.

**Db2 Z Os Cloning**

The IBM® Db2® Cloning Tool for z/OS automates the cloning process for Db2 subsystems. It's a superior tool for moving enterprise data across the IT landscape. The tool provides the capability to respond quickly to demands for usable Db2 subsystem clones and reduces the time needed to create them, from hours (or even days) to minutes.
