So far I have struggled with statistics and I also know it isn't the only factor in making medical decisions. I also don't want to be a doc that can't think past the algorithm. I think it would be a shame for others looking for decision making training to skip it because the focus is emergency medicine.

[Decision-Making and Emergency Responses](#)

Decision making is part of problem solving, and decision making occurs at every step of the problem-solving process. Therefore, a decision making process is a critical component in any organizations response. Following are the important steps of the decision making process. Each step may be supported by different tools and techniques.

[Emergencies and Effective Decision Making](#)

Critical thinking underlies independent and interdependent decision making. Critical thinking includes questioning, analysis, synthesis, interpretation, inference, inductive and deductive reasoning, intuition, application, and creativity 8 (p. 9). Course work or ethical experiences should provide the graduate with the knowledge and skills to:

7 factors for critical decision making for police leaders There is no magic to making operational decisions. All it takes is leadership that cares about doing the right thing for everyone

[ICAT Module #2: Critical Decision-Making Model](#)

In Critical Decision Making, Chief Michael Barakey gives emergency first responders the tools to succeed on every incident where they make critical decisions and mitigate incidents daily under stress. This book reviews cases to identify common incident elements that hinder quality decision making, and it introduces point-to-point leadership, a systematic approach to making critical decisions from the time responders are alerted to an incident to its resolution.
