VESDA A LaserPLUS

VESDA Pipe™ One of the key elements in the performance of a VESDA aspirating smoke detection system is the network of sampling pipes that actively transport air from a protected area to the detector. Xtralis offers an extensive range of pipe and fittings to suit all your application needs, ensuring a quality system is installed every time.

Xtralis VESDA ASPIRE2™ Pipe network design software

VESDA A LaserPLUS™ INSTALLATION MANUAL ... • The performance of the system depends on the pipe network designed for the site. Any alteration to the pipe network may alter the performance of the system. The ASPIRE™ design tool is to be used to verify the suitability of any pipe network
