Mikrotik IPsec Tunnel/VPN When Both Sides Have Dynamic IPs/DHCP. At first glance, one would think this is impossible. It is NOT impossible, thanks to some scripting and a couple of free services. This will work for straight IPsec tunnels, PPTP tunnels, IPIP tunnels or even IPIP tunnels encrypted with IPsec.

Mikrotik IPsec Tunnel/VPN When Both Sides Have Dynamic IPs ...

Mikrotik Settings Remove ddns script and disable the scheduler of the script if there is any. Go to system->scripts and system->scheduler. For NTP either the SNTP client of Mikrotik or the NTP server of Mikrotik's cloud servers can be used. I chose to go with Cloud NTP server.

How to setup DDNS in Mikrotik without a script - Nubcakes ...

In this post we are going to create an IPsec VPN tunnel between two remote sites using Mikrotik routers with dynamic public IPs. By default, Mikrotik does not allow to use FQDN (domain names) to setup an IPsec tunnel, so we are going to create some scripts to update the IPsec configuration whenever the local or remote IPs change.

Create an IPsec tunnel between 2 Mikrotik routers and ...

MikroTik RouterOS offers IPsec (Internet Protocol Security) VPN Service that can be used to establish a site to site VPN tunnel between two routers. IPsec is a network protocol suite that authenticates and encrypts the packets of data send over a network.

MikroTik Site to Site IPsec when one router has a dynamic WAN IP address. In this part of the MikroTik IPsec series, I will show you how to establish a Site to Site IPsec tunnel between two routers, when one of them has a dynamic WAN IP address. This scenario is different than other one described in this article where MikroTik is behind another router, as in this case our MikroTik has a WAN port (like a 3G/4G-LTE or cable modem) with the dynamic IP address, plus there's a good chance that ...
