1) Functions of the blood include A) transport of nutrients and wastes. B) regulation of pH and electrolyte concentration of interstitial fluids. C) restricting fluid loss.

Anatomy and Physiology Chapter 1-3 | Biology Flashcards ...
Anatomy and physiology are often taught separately from the psycho-social aspects of care. This can make it difficult for students to apply and integrate their knowledge of human anatomy to patient care. The philosophical framework developed by the authors of this book will go a long way towards developing truly holistic nursing care.
