Load Flow Analysis of 132 kV substation using ETAP Software  
Rohit Kapahi Abstract-Power is essentially required for the  
development of any country. To maintain the generation of  
electric power at adequate level the power has to be transmitted  
in proper form and quality to the consumer. This research paper  
deals with the simulation of 132 kV

ETAP 14.1 is the latest upgrade to the ETAP 14 series and includes important enhancements based on the industry's latest demands such as multi-language output reports and arc flash labels. Upon finishing installation of ETAP 14.1, a new 48-digit activation code is required to activate and open the application.

## ~~Power System Analysis~~

The objective of this ETAP Tutorial is to illustrate the basics of creating and building a single-line diagram in ETAP Software.It will be discussed here on how to add power system elements to the one-line view (OLV). ETAP provides a user-friendly, Graphical User Interface (GUI) for creating one-line or single-line diagrams.
