Ethnobotany: An Introduction

Ethnobotany is the study of the interrelationship between people and plants, historically and cross-culturally, particularly the role of plants in human culture and practices, how humans have used and modified plants, and how they represent them in their systems of knowledge. This programme combines ...

Ethnobotany

SC/SS 115 Ethnobotany combines the study of the interaction of people and plants with a broad survey of the diversity of plants described both scientifically and culturally. Students learns about the social impact of plants on culture while becoming knowledgeable in the characteristics, local uses, and names of the major plant phyla present in Micronesia.
