For example, your research question might be "What is the effect of prolonged TV-watching on children?" You can then use that question to build your study around. Narrow down your research topic if it's too broad. A broad research topic makes breaking the objectives down much more difficult.

*What are research objectives?| Editage Insights*

Research objectives Research objectives are derived from the purpose. They set out what is to be achieved in a research study in specific terms. They are crucial in any research since they determine the kind of questions and procedures to be used in data collection, and analysis. In stating objectives, just like in purpose of the study,

*4.3 Research objective(s)*

A research objective must be achievable, i.e., it must be framed keeping in mind the available time, infrastructure required for research, and other resources. Before forming a research objective, you should read about all the developments in your area of research and find gaps in knowledge that need to be addressed.

### *Writing the Research Objectives with 5 Real Examples*

Research objectives quite simply answer a simple question – Why are you conducting this market research? Off course, that question does not have a simple answer. The answer can go down in depth and become 10 more questions. For example – Are you conducting this market research to find out the strength of your brand, or to find out about competition sales figures, or find out brand recall etc etc.
