ESC: About —extrastatecraft.net

Even at a moment of ubiquitous computing, Extrastatecraft: the Power of Infrastructure Space considers space itself as an information system with the power and currency of software—a spatial operating system for shaping the city. With an experimental narrative structure, the book, moves between exposing evidence of infrastructure space and learning to hack this space with forms that offers surprising aesthetic pleasures and political capacities.

Extrastatecraft: the power of infrastructure space. By ...

Extrastatecraft is a study of "infrastructure space", which Easterling, a professor of architecture at Yale, defines as "the rules governing the space of everyday life" – mostly mundane, repeatable spaces such as car parks and hotels, cash machines, suburbs, business parks, satellite communications and electronic devices.

Extrastatecraft: The Power of Infrastructure Space

Yet the infrastructure space that Extrastatecraft depicts is also deeply embedded in systems of replication and (re)legislation which surpass the materiality of the concrete trade oasis or the visceral pervasiveness of submarine and cross-continental cabling, and, therefore, Easterling also takes us to the operations of the International Organization for Standardization (ISO), where the construction of 'quality' standards embodies the 'power that non-state organizations can have in the ...

something more powerful—as information itself. Infrastructure space has become a medium of information. The information resides in invisible, powerful activities that determine how objects and content are organized and circulated. Infrastructure space, with the power and currency of software, is an operating system for shaping the city.

CrossRef DOI: 10.3202/caa-reviews.2018.15. Keller Easterling's Extrastatecraft: The Power of Infrastructure Space is a palimpsest of a book. It is rich with stories of intricate entanglements among capital, space, and politics; it provides a probing analysis focused on how this evidence allows for a new understanding of how the world operates.

Extrastatecraft: The Power Of Infrastructure

"An extraordinary guidebook to the politics of infrastructure in the contemporary world, Extrastatecraft is a pivotal and beautifully written excavation of the hidden geographies of globalisation. 'Free' trade zones, optic fibre networks, credit cards, mobile phones, economic and financial rules ... all emerge as charged elements within an often invisible geography that could not be more important.
