The Fairchild Metroliner III (Metro III for short) is our third largest aircraft, capable of transporting up to 19 passengers per flight. With a cruising speed of 300 mph, and a range of 1700 statute miles, the Metro III is the second fastest aircraft with the longest range in our fleet.

---

### Fairchild Metro Iii Aircraft Flight

An all-new aircraft was built and named the SA226-T Merlin III with a new nose, wings, landing gear, cruciform horizontal tail [note 1] and inverted inlet Garrett engines. Ultimately a stretch of the Merlin III was designed, sized to seat 22 passengers and called the SA226-TC Metro.

The Metro IV also know as the Metro 23. The aircraft is developed from the Metro III providing better systems, more power and increased Takeoff weight. One version of the Metro 23 is equipped with an external pod under the lower fuselage for greater baggage capacity. Structurally there is little difference between the SA226 and SA227.

SA227-BC

From the Merlin, I Swearingen developed  
the turboprop powered II and III which  
were to form the basis of the new Metro  
commuter airliner. The Metro was  
Swearingen's first complete inhouse  
design and development work began in  
the late 1960s, resulting in the SA226TC  
Metro's first flight on August 26, 1969.
