Electrical engineers are some of the most versatile of engineering types, finding employment in aviation, consumer goods, technology, transportation, logistics, and a wide range of other industries. While most forms of engineering already provide a steady and well-compensated gig for life, Ph.D.'s in electrical engineering are highly sought ...

Geology. A deep understanding of geology provides the foundation for many of GeoEngineers' services. We apply our knowledge of surface and subsurface conditions and geologic processes to a wide range of challenges, helping clients mitigate risk, maximize return on investment and enhance natural systems.

In this 101-level lunch and learn, Dr. Russel-Houston will present the basics of petroleum geology and discuss how reservoirs are discovered, delineated, and developed. Using examples from the oil sands, she will show how geologists in collaboration with engineers have solved complex problems and improved reservoir performance. Speaker Bio:
