For every 100 calories of grain we feed animals, we get only about 40 new calories of milk, 22 calories of eggs, 12 of chicken, 10 of pork, or 3 of beef. Finding more efficient ways to grow meat and shifting to less meat-intensive diets—even just switching from grain-fed beef to meats like chicken, pork,...

This law, which reauthorizes the Global Food Security Act for an additional five years, sends a strong message that America is continuing its commitment to tackling the root causes of hunger through Feed the Future. For the most recent information and reports on Global Food Security Act implementation, please visit the Progress page.

### *About | Feed the Future*

In the end, feeding 8.5 billion people by 2030 is as much a matter of mindset as it is of technology. To get there, we need to shift our ingrained assumptions about how the global food system works, how we make sure everyone has enough to eat, and most of all, why it matters.

### *Feeding 9 Billion | National Geographic*

Feed the Future also coordinates activities and support across a set of aligned countries and at the regional level in Asia, Latin America and the Caribbean, the Middle East, and East, Southern and West Africa to improve food security, resilience and nutrition. Explore each country's strategy and results on the Feed the Future website.

### *The future of the global food system | Philosophical ...*

The global food system has been very effective at feeding the population but by 2050 food demand will be 60% higher than its current level. A fundamental transformation is needed to cope. What milestones need to be achieved by 2030, 2050 and beyond to cope with the increasing demand?

The Feed the Future Initiative (FTF) was launched in 2010 by the United States government and the Obama Administration to address global hunger and food insecurity. According to the National Institute of Food and Agriculture, it is "the U.S. government's global food security initiative.". The Feed the Future Initiative began as an effort "to combat the global food price spikes of 2007 and 2008."
