COURSE OBJECTIVE: The aim of this introductory course is exposure to the fundamental principles of atmospheric radiation and their applications at a level appropriate to a non-specialist.

~~METEO 436—ATMOSPHERIC PHYSICS I~~

Readers may be familiar with Grant Petty's earlier book, "A First Course in Atmospheric Radiation," which was published by Petty's own Sundog Publishing and provided an inexpensive and relatively complete coverage of atmospheric radiation at the undergraduate level. This book does the same thing for atmospheric thermodynamics.

Textbooks almost never make their authors rich, and Grant Petty already has a day job as an associate professor at the University of Wisconsin, so he must have had something he wanted to say pretty urgently to write *A First Course in Atmospheric Radiation*. He has certainly taken a different approach than the authors of the half-dozen tomes that already exist on the subject. His book is aimed ...

1 ATOC/ASEN 5235: Introduction to Radiative Transfer and Remote Sensing
Fall 2010 Course Goals This class will discuss basic concepts of radiative transfer, and application of these concepts to remote sensing problems. The goal is to survey some fundamental principles upon which remote sensing techniques are based, and to examine different types of remote measurements.
