~~Operational Guidelines for HIV Sentinel Surveillance~~

Background. Sentinel surveillance (SS) using unlinked anonymous HIV testing (UAT) of women attending antenatal clinics (ANC) provides a primary source of data on HIV prevalence in the adult population in countries with generalized HIV epidemics [1, 2]. ANC SS conducted over many years in the same setting allows for monitoring of trends in HIV prevalence.

~~Methods | CDC~~

These guidelines Subject Category: Publications see more details are aimed at National AIDS Programme managers and epidemiologists who work in HIV surveillance, and are intended to clarify the use of appropriate methods and strategies in setting up a sentinel surveillance system among antenatal clinic attendees and other groups. It ...
