Thank you in advance!

Lab #14 EMISSION SPECTROSCOPY INTRODUCTION
In the belief that a truly helpful manual should attempt to answer, rather than to ask, some of the many questions which arise in connection with the experiments, the quizzing of the student on his preparation and reading has been left in the hands of the laboratory instructors, and an effort has been made to provide the student with useful

We were off by 1588 J/Kg/oC from the specific heat capacity of water given in the textbook. Our experiment could have used a digital system to reduce the amount of electrical noise and make volts entering the water constant. Another aspect of the experiment that was not perfect was the use of non-distilled water.
