2002—2003 Honda XR 250R
The XR250 forks have compression dampening adjustments only. SAG. The two rings on the rear shock are to set the pre-load and to set the sag. Sag is how much does the bike saq when the owner sits on it. Setting the sag is really about raising and lower the rear end of the motorcycle to affect how the front end steers. Let's say you weigh 210 lbs.

Motorcycle Brakes & Suspension Parts for Honda XR600R for ...
Air caps top both fork tubes, but Honda recommends running the fork at zero psi. Both front and rear suspension components are Kayaba units, a break from Honda's usual supplier, Showa. Like the bigger XRs, the 250 has a front disc brake. The powerful twin-piston caliper grabs a stainless steel rotor 240mm in diameter and 3.5mm thick.
