About the IAC. The Intersocietal Accreditation Commission (IAC) provides accreditation programs for vascular testing, echocardiography, nuclear/PET, MRI, diagnostic CT, dental CT, carotid stenting, vein treatment and management, cardiac electrophysiology and cardiovascular catheterization. The IAC programs for accreditation are dedicated to ensuring quality patient care and promoting health ...

~~IntACT~~

International Application Specialist Computed Tomography Posted on November 19, 2019 by CMSE CPN (DABO) is the organization within Canon Medical Systems Europe responsible for managing the European Channel Partner Network that covers close to 40 countries and territories.

~~IAC | Improving Health Care Through Accreditation@~~

An international randomized controlled trial of two interventions for reducing doses for computed tomography through audit feedback and sharing best practices. European Congress of Radiology, European Society of Radiology, Vienna, Austria, March 2018.

~~Computed Tomography — American Registry of Radiologic ...~~

The 6th International Conference on Image Formation in X-Ray Computed Tomography will take place in Regensburg, Germany, between August 3 and August 7, 2020. Since August 2018 there is a team organising in the background:

~~CT Meeting 2020~~

The 22nd ISCT (International Society for Computer Tomography) Symposium is dedicated to cutting-edge computed tomography technology and techniques and practical multi-spectral CT techniques and applications for clinical practice, focusing on five primary themes in every session: strategies for technologists, protocol overhauls, controversies, good CT vs bad CT and CT updates.

~~RadiologyInfo.org~~

Computed Tomography is a medical imaging modality that produces cross-sectional images of the body using X-rays and digital computers in order to identify pathological conditions that are difficult to evaluate through conventional radiography alone.

~~International Application Specialist Computed Tomography ...~~

Abdominal computed tomography scan (CT) is the preferred radiographic study for the diagnosis of appendicitis in the United States, while radiologist-operated ultrasound (US) is often used in Israel. This comparative international study evaluates the performance of CT vs. US in the evaluation of acute appendicitis.

~~Computed Tomography | Transportation Security Administration~~

International Symposium on Computed Tomography and Image Processing for Industrial Radiology June 23-25, 2003 - Berlin, Germany in cooperation with: ASNT and BINDT • About the Conference & How to Order the CD-ROM

~~Industrial computed tomography — Wikipedia~~

Computed Tomography. As a CT technologist, you'll likely work in a hospital or an imaging center. You'll perform scans on all parts of the body for a variety of reasons. Some patients need imaging to diagnose a disease or an acute condition. Others need CT scans in emergencies, so physicians can understand the extent of injuries.

~~Computed Tomography (CT), Cert (Online) | Loma Linda ...~~

Cone beam computed tomography is a modification of the computed tomography (CT) concept, involving the single rotation of an X-ray source around the dental subject. The data are analysed and reconstructed using a CT-based algorithm to create a volume of data, which can be viewed in three conventional planes (axial, sagittal and coronal) and ...

~~International variation in radiation dose for computed ...~~

TSA is collaborating with airlines and industry to test and deploy Computed Tomography (CT) technology to security checkpoints. What is CT? CT is the latest checkpoint X-ray scanning equipment to enhance threat detection capabilities for carry-on baggage. The technology is similar to CT technology used in the medical field and research shows that CT is the most consequential

~~ISCT~~

Computed Tomography The goals of the association are the facilitation and promotion of scientific knowledge and cooperation in the field of computed tomography in the non-medical world. IntACT wants to stimulate the application of computed tomography in a context as broad as possible.

~~Conferences and Meetings on Radiology: Computed Tomography~~

RadiologyInfo.org is not a medical facility. Please contact your physician with specific medical questions or for a referral to a radiologist or other physician. To locate a medical imaging or radiation oncology provider in your community, you can search the ACR-accredited facilities database.

~~International Symposium on Computed Tomography and Image ...~~

The International Journal of Cardiovascular Imaging publishes basic and clinical communications (research articles, review articles, technical notes and editorial comments) dealing with the design, development and evaluation of imaging methods used to study cardiovascular diseases; these imaging techniques include Magnetic Resonance, computed tomography, X-ray imaging, nuclear cardiology and ...

~~An international evaluation of ultrasound vs. computed ...~~

Industrial computed tomography (CT) scanning is any computer-aided tomographic process, usually X-ray computed tomography, that uses irradiation to produce three-dimensional internal and external representations of a scanned object. Industrial CT scanning has been used in many areas of industry for internal inspection of components.

~~The International Journal of Cardiovascular Imaging | Home~~

The "International Conference on Image Formation in X-ray Computed Tomography", widely known as "The CT Meeting", is dedicated to basic problems related to X-ray CT. It is a friendly, informal, workshop-style meeting where most experts in this field come together.

~~International Computed Tomography~~

Deeply committed to the pursuit of knowledge, the International Society for Computed Tomography has been encouraging innovation, collaboration, and the challenging of beliefs within CT through its annual CT symposium (ISCT 2019) and educational on-demand content for over two decades.

~~22nd ISCT (International Society for Computer Tomography ...~~

Computed Tomography. Computed tomography (CT) is a diagnostic imaging test used to create detailed images of internal organs, bones, soft tissue and blood vessels. The cross-sectional images generated during a CT scan can be reformatted in multiple planes, and can even generate three-dimensional images which can be viewed on a computer monitor ...
