~~What You Need to Know About High Fructose Corn Syrup ...~~

High fructose corn syrup is actually cheaper than granulated sugar in America. The government pays subsidies to farmers for corn. Many products made with this ingredient are going to be more affordable than foods made with whole, natural ingredients. Fast food is also a cheap option.

~~High fructose corn syrup foods: Which to avoid and why~~

High-fructose corn syrup, which is found in numerous processed foods, is primarily used by manufacturers — surprise! — as a cost-cutting measure. Because fructose is the sweetest form of sugar, it stands to reason that increasing the fructose content of corn syrup would mean that you don't need to use as much of it to get the same amount of sweetening.

~~Is High Fructose Corn Syrup Really Worse Than Regular ...~~

High-fructose corn syrup has long been portrayed as an evil of the American diet. Find out what's exactly in this mysterious sweetener, and how bad it really is for your health.

~~Why Is High Fructose Corn Syrup Banned in Europe ...~~

The claim: High-fructose corn syrup is worse for you than regular table sugar (sucrose). The facts: High-fructose corn syrup has been blamed for everything from obesity and dementia to heart attacks and strokes. But the truth is far more complicated, so some background is in order: Table sugar (sucrose, from sugar cane or sugar beets) is made up of fructose (also found in fruit and honey) and ...

~~10 Deceiving New Names for High Fructose Corn Syrup — Live ...~~

Many people have misconceptions about regulations concerning high fructose corn syrup in the European Union, or EU. Contrary to common opinion, high fructose corn syrup isn't banned in Europe.

~~What Is High Fructose Corn Syrup and Is It Bad For You ...~~

High fructose corn syrup is used in almost every processed food on the market, and helps to preserve foods. Doesn't sound that bad, right? Well, on paper, it isn't that bad. It's cheaper than sugar, has about the same number of calories, and allows food to sit on the shelf for longer because it doesn't absorb moisture like real sugar.

~~What is the Difference Between Corn Syrup and High ...~~

“Simply eliminating the high fructose corn syrup designation for the laboratory sweetener that’s nine-tenths fructose and calling it what it really is: fructose. And that’s how a processed-food product like Vanilla Chex that contains “fructose,” a substance that, according to the corn refiners, used to be called HFCS-90, can now declare itself to be high fructose corn syrup-free (3

~~20 Foods With High Fructose Corn Syrup (HFCS)~~

But high-fructose corn syrup isn't pure fructose (100%-fructose foods don't exist outside of the laboratory; neither do 100%-glucose foods). High-fructose corn syrup is half fructose and half glucose—just like table sugar is. And, because they both contain glucose, HFCS and table sugar do activate leptin and ghrelin systems, says Melanson.

~~6 Reasons Why High Fructose Corn Syrup Is Bad for You~~

Introduction. FDA receives many inquiries and comments from the public about the chemistry of high fructose corn syrup (HFCS) in relation to other sweeteners such as table sugar and honey, and ...

~~High fructose corn syrup — Wikipedia~~

High-fructose corn syrup is a common sweetener in sodas and fruit-flavored drinks. As use of high-fructose corn syrup has increased, so have levels of obesity and related health problems. Some wonder if there's a connection. High-fructose corn syrup is chemically similar to table sugar.

~~Is High Fructose Corn Syrup~~

High-fructose corn syrup (HFCS), also known as glucose-fructose, isoglucose and glucose-fructose syrup, is a sweetener made from corn starch. As in the production of conventional corn syrup, the starch is broken down into glucose by enzymes. To make HFCS, the corn syrup is further processed by glucose isomerase to convert some of its glucose into fructose.

~~High Fructose Corn Syrup, The Truth About HFCS~~

Both products are made from corn starch, but regular corn syrup is 100 percent glucose, while high-fructose corn syrup (HFCS) has had some of its glucose converted to fructose enzymatically. Scientists are examining the potentially negative effects of consuming large amounts of fructose in the form of HFCS, but regular corn syrup is not part of that consideration, as it does not contain fructose.

~~What's So Bad About High Fructose Corn Syrup? | EatingWell~~

Corn syrup refers to a syrup containing dextrans, maltose, and dextrose that is obtained by partial hydrolysis of cornstarch while high-fructose corn syrup refers to corn syrup to which enzymes have been added to change some of the glucose into fructose, making the product sweeter than regular corn syrup.

~~Corn Syrup vs. High Fructose Corn Syrup: There Is a ...~~

But HFCS is a sugar syrup, close to honey in ratio of fructose to glucose. Just because it has this scary chemical name, high fructose corn syrup, people must think that it's made up of some evil fructose chemical. But all fructose molecules are exactly the same, whether it's in honey, a fruit, maple syrup, cane sugar, or HFCS.
