Free JavaScript 1.8.5 Download - JavaScript 1.8.5 for Windows

The logical OR (||) operator (logical disjunction) for a set of operands is true if and only if one or more of its operands is true. It is typically used with Boolean (logical) values. When it is, it returns a Boolean value. However, the || operator actually returns the value of one of the specified operands, so if this operator is used with non-Boolean values, it will return a non-Boolean value.

Logical OR (||) - JavaScript | MDN

It is typically used with Boolean (logical) values. When it is, it returns a Boolean value. However, the && operator actually returns the value of one of the specified operands, so if this operator is used with non-Boolean values, it will return a non-Boolean value. Important Oracle Java License Update The Oracle Java License has changed for releases starting April 16, 2019. The new Oracle Technology Network License Agreement for Oracle Java SE is substantially different from prior Oracle Java licenses. The new license permits certain uses, such as personal use and development use, at no cost -- but other uses authorized under prior Oracle Java licenses ...

Download Java for Linux

JavaScript (JS) is a lightweight, interpreted, or just-in-time compiled programming language with first-class functions. While it is most well-known as the scripting language for Web pages, many non-browser environments also use it, such as Node.js, Apache CouchDB and Adobe Acrobat. JavaScript is a prototype-based, multi-paradigm, single-threaded, dynamic language, supporting object-oriented, imperative, and declarative (e.g. functional programming) styles.

JavaScript | MDN

JavaScript (/ˈdʒɑːvəˌskɪrɪpt/), often abbreviated as JS, is a programming language that conforms to the ECMAScript specification. JavaScript is high-level , often just-in-time compiled , and multi-paradigm .

JavaScript - Wikipedia

A JavaScript identifier — again, just a name for any object — must start with a lower or upper case letter, underscore (_), or dollar sign (\$); subsequent characters can also include digits (0-9).

The Dollar Sign (\$) and Underscore (_) In JavaScript
