A commonly played song can only be considered a jazz standard if it is widely played among jazz musicians. The jazz standard repertoire has some overlap with blues and pop standards. The most recorded jazz standard was W. C. Handy's "St. Louis Blues" for over 20 years from the 1930s onward, after which Hoagy Carmichael's "Stardust" replaced it.

Book three of Constructing Walking Jazz Bass Lines has a more theoretical approach to the book than the previous two volumes. Part 1 focuses on the theory needed to play jazz standards. It covers everything from modes and chord scale relationships to voice leading and approaches for application within a progression.

There are hundreds and even thousands of jazz standards to learn. Playing jazz requires a reasonable amount of repertoire ready to be played at a moment's notice (no pun intended). It can be overwhelming! We get emails from time to time from musicians asking for advice on which standards to learn. There are so many standards [...]

This week's post features a guitar arrangement of the jazz standard, "Out of Nowhere" written by Green & Heyman. Following is a brief harmonic analysis of the piece, designed to help you identify the cadences (eg. II-Vs) that make up the overall chord progression along with their corresponding scales.
