At larger airports, Jeppesen can't fit all the information onto one page so you will always have two pages. Check out Jeppesen's Portland International Airport charts: So, that's it. Those are all the differences to the FAA and Jeppesen charts. This article is getting long, so I am going to break it up

into several parts.

Jeppesen Airway Manual General - GENERAL AIRWAY MANUAL ...

Kode ACN. Kalau PCN adalah nilai kekuatan pavement maka ACN (Aircraft Classification Number) adalah nilai yang menyatakan efek relatif sebuah pesawat pada sebuah permukaan yang memiliki kategori subgrade yang baku. Untuk mendapatkan nilai ACN maka kita harus mempunyai tabel ACN yang dikeluarkan oleh ICAO atau dikeluarkan oleh pabrik pesawatnya.

General Aviation IFR Charts - Jeppesen

- JEPPESEN: "Normally the LCN/LCG of an aircraft should not be above that of the runway on which a landing is contemplated. Pre-arranged exceptions may be allowed by airport authorities." and "The appropriate authority may establish criteria to regulate the use of a pavement by aircraft with an ACN higher than the PCN

bearing strengths. The ACN-PCN system of rating airport pavements is designated by the International Civil Aviation Organization (ICAO) as the only approved method for reporting strength. The ACN-PCN method came into use in 1981. Although there is a great amount of material published on how to compute an ACN (Ref. 2 and 3), ICAO has not specified

Website penerbangan Indonesia - Pavement Classification ...

The intend of the ACN/PCN Calculator is to check the bearing capability of a pavement using the ICAO approved method for reporting the strength of a pavement published in the Annex 14 and Doc 9157 Part 3. The ACN determination using the curves and tables presently publish by the manufacturer may be fastidious and leading to errors.
