For an engine to run properly, the spark plug in a cylinder has to fire at a specific time. To produce the required energy for the spark at the required time, the magneto must be in the E-gap position, the breaker points must start to open, and the distributor must be electrically aligned with the particular cylinder.

Owned by PG&E National Energy Group, and operated by
Wärtsilä North America Inc. Billed as the world's largest natural
gas-fired reciprocating engine generating station, the 111-MW
Plains End Power Plant has successfully demonstrated that large
distributed generation plants don't necessarily have to be gas
turbine-based. Plains End's NOx and CO emissions are
comparable to those...

Powerplant (JAR Ref 021 03) Table of Contents - Jeppesen
The Stridsvagn 103 was developed in the 1950s and was the first
mass-produced main battle tank to use a turbine engine. Since
then, gas turbine engines have been used as APUs in some tanks
and as main powerplants in Soviet/Russian T-80s and U.S. M1
Abrams tanks, among others.
