Frank Whittle and the birth of the jet engine  
The story of Frank Whittle - RAF pilot, mathematician of genius, inventor of the jet engine and British hero. In 1929, a twenty-two-year-old maverick named Frank Whittle - a self-taught aeronautical obsessive and risk-takingly brilliant RAF pilot - presented a blueprint for a revolutionary, jet-powered aircraft engine to the Air Ministry. His idea had the potential to change the course of history, but it was summarily rejected.

Jet Man: The Making and Breaking of Frank Whittle, Genius ...  
In October 1945, Frank Whittle piloted a jet for the first time, a Meteor F.4 powered by a later version of the Welland, the Derwent V. A few days later it set a world record at 606 mph. A modified version of the Derwent originally developed by General Electric, the Allison J33, would power the United States' first production jet fighter, the Lockheed P-80 Shooting Star.

Jet: The story of a pioneer: Amazon.co.uk: Whittle, Frank ...  
On the 15th of May, 1941, the first British jet-powered plane took off from RAF Cranwell on a historic 17 minute flight. The jet age had begun! The man who made it possible was Coventry-born engineer, Sir Frank Whittle. From an early age Whittle had been more interested in engines and aircraft than anything else and soon decided to join the RAF. Whittle's family were of modest means and he could not afford to enter the RAF College at Cranwell, so attempted to enter as an apprentice.

The Jet Engine and Sir Frank Whittle - Midland Air Museum  
Frank Whittle invented [jet engine] Sir Frank Whittle was a British pilot, aviation engineer and inventor of the 20th century who is best known for the invention of the jet engine. He was born in 1907 to a working class family; his father was a mechanic and inventor.

BBC - History - Frank Whittle  
The Gloster E.28/39, (also referred to as the Gloster Whittle, Gloster Pioneer, or Gloster G.40) was the first British jet-engined aircraft and first flew in 1941. It was the fourth jet to fly after the German Heinkel He 178 (1939), the Italian Caproni Campini N.1 motorjet (1940), and the German Heinkel He 280 (1941).

Gloster E.28/39 - Wikipedia  
In the case of air travel and engines, jet propulsion means that the machine itself is powered by jet fuel. While Von Ohain is considered the designer of the first operational turbojet engine, Whittle was first to register a patent for his schematics of a prototype, in 1930. Von Ohain obtained a patent for his prototype in 1936, and his jet was the first to fly in 1939.

The History and Invention of the Jet Engine  
aviator engine, Frank, Jet, Whittle Sir Frank Whittle (June 1, 1907 ÷ August 9, 1996), British inventor, engineer, Royal Air Force officer. He is considered to be the father of the jet engine. The person who first realized that the gas turbine could be used as a jet engine in airplanes was British aviator and engineer (born 1907) Frank Whittle.

Frank Whittle - Father of The Jet Engine | aviationfile ...  
Commodore Sir Frank Whittle, OM, KBE (1 June 1907÷9 August 1996) was a Royal Air Forceofficerwho invented the jet engine. Due to funding and manufacturing problems, and a lack of foresight on the part of the British Government in keeping

FRANK WHITTLE INVENTOR OF THE JET ENGINE  
The English aeronautical engineer Sir Frank Whittle is credited with the invention of the jet engine. Jet-propelled airplanes can fly faster and higher than ordinary airplanes. (See also jet propulsion.) Frank Whittle was born June 1, 1907 in Coventry, England.
