Jis Japanese Industrial Standard Japanese

The Japanese Industrial Standards Committee (JISC), Japan's national standardization body, plays a central role in developing standards in Japan covering a wide range of products and technologies from robots to pictograms.

JISC-Japanese Industrial Standards Committee

Japanese Industrial Standards (JIS) 日本工業規格, Nihon Sangyō Kikaku, formerly 日本規格 Nihon Kōgyō Kikaku until June 30, 2019) are the standards used for industrial activities in Japan, coordinated by the Japanese Industrial Standards Committee (JISC) and published by the Japanese Standards Association (JSA). The JISC is composed of many nationwide committees and plays a vital role in standardizing activities across Japan.

Japanese Industrial Standards - Wikipedia

The Japanese Industrial Standards Committee (JISC), Japan's national standardization body, plays a central role in developing standards in Japan covering a wide range of products and technologies from robots to pictograms.

Japanese Industrial Standards Committee:About the JISC

JIS - Japanese Industrial Standards specifies the standards used for industrial activities in Japan. The standardization process is coordinated by Japanese Industrial Standards Committee - JISC - and published through Japanese Standards Association - JSA. The objective of the Japanese Standards Association - JSA - is "to educate the public regarding the standardization and unification of industrial standards, and thereby to contribute to the improvement of technology and the enhancement of ...
