Implementation and Bit Error Rate analysis of BPSK ...
Implementation of FSK Modulation and Demodulation using CD74HC4046A Mahendra Patel..... Standard Linear and Logic ABSTRACT In telecommunications and signal processing, frequency modulation (FM) is encoding of information on a ... 8 Implementation of FSK modulation and demodulation using SLAA618-November 2013 CD54/74HC/HCT4046A Submit ...

EXPERIMENT #8 FREQUENCY MODULATION
Modulation and Demodulation. 1. Click on the Test Points (T.P) buttons to view the output waveform at that point. You can also check and compare multiple outputs by pressing all the T.P buttons one by one . 2. Vary SNR step by step and observe the changes in the output. Here two types of Demodulators are used (Squaring Loop and Costas Loop).

Lab 8 - DPSK Modulation and Demodulation - Department of ...
(23 votes, average: 4.04 out of 5) Binary Phase Shift Keying (BPSK) Binary Phase Shift Keying (BPSK) is a two phase modulation scheme, where the 0's and 1's in a binary message are represented by two different phase states in the carrier signal: . for binary 1 and . for binary 0.

BPSK - BINARY PHASE SHIFT KEYING
In this project we are simulating code matlab program three modulation schemes; those are namely BPSK, QPSK and 8-QAM.Firstly, we applied Rectangular pulse shaping (RPS) to BPSK, QPSK and 8 QAM. Secondly,we considered BPSK modulation scheme and simulated the system using Square Root Raised Cosine (SQRC) filter as pulse shaping filter and ...

COMMUNICATION-I LAB MANUAL EEC-552 DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING ... SYLLABUS FOR Communication Lab-I EEC 552 COMMUNICATION LAB-1. To study DSB/ SSB amplitude modulation & determine its modulation ... 8. To study Pulse Width Modulation and Pulse Position Modulation 9.

Experiment 20 - Quadrature Phase Shift Keying
Lab 5 BPSK - Binary Phase Shift Keying INTRODUCTION: Generation of BPSK: Consider a sinusoidal carrier. If it is modulated by a hi-polar hit stream according to the scheme illustrated in Figure below, its polarity will be reversed every time the bit stream changes polarity. This, for a sinewave, is equivalent to a phase reversal (shift).

Binary Phase Shift Keying (BPSK) - modulation and ...
Lab 5: Phase Modulation and Constellations. Achievements: Generation of binary phase shift keyed (BPSK) signal; bandlimiting; synchronous demodulation - phase ambiguities. ... Because the DECISION MAKER, used in the receiver, needs to operate in the range about 2 to 4 kHz, the BPSK carrier will be in the range about 8 to 16 kHz.

COMMUNICATION-I LAB MANUAL EEC-552
Modulator and Demodulator labview source code-BPSK,QPSK,16QAM,64QAM. This page of labview source code covers modulator labview vi and demodulator labview vi. It covers BPSK, QPSK, 16QAM and 64QAM modulation techniques.It provides link to download labview VI source code.

Phase-shift keying - Wikipedia
Lab 1: Amplitude Modulator and Demodulator Objective. To understand the theoretical foundations of Analog Communications as well as of Double-Side-Band Amplitude Modulation and Demodulation (DSB-AM) To design the Simulink model of the DSB-AM to analyze each signal in time and frequency domains using time scope and spectrum analyzer

Lab 5 BPSK - Binary Phase Shift Keying
Differential phase shift keying (DPSK) is a common form of phase modulation that conveys data by changing the phase of the carrier wave. As mentioned for BPSK and QPSK there is an ambiguity of phase if the constellation is rotated by some effect in the communications channel through which the signal passes.

Modulator and demodulator labview VI-BPSK,QPSK,16QAM,64QAM
The circuitry in this lab operates on a carrier frequency of 100 kHz, which is in the VLF band. At such a low carrier frequency, the frequency deviation needs to be limited so that the available bandwidth is not used up.

BPSK Modulation And Demodulation- Complete Matlab Code ...
Department of Electronics and Electrical Engineering Indian Institute of Technology Guwahati EC-331 Communication Laboratory Expt-8: DPSK Modulation and Demodulation Objective: To implement a non-coherent detection mechanism based on differential phase shift keying. Lab report = 10 marks, Performance = 10 marks. General Instructions: 1. Clear all the F/F's using 'CLR' pin before starting ...

74 - D1 BPSK - binary phase shift keying BPSK ext trig 8 kHz Figure 5: model of the BPSK generator The AUDIO OSCILLATOR supplies a TTL signal for the bit clock digital DIVIDE- BY-FOUR sub-system in the LINE-CODE ENCODER, and a sinusoidal signal for the carrier.

BPSK Modulation (Binary Phase Shift Keying)
keying (BPSK). Recall that BPSK is basically a DSBSC modulation scheme with digital information for the message. Importantly though, the digital information is sent one bit at a time. QPSK is a DSBSC modulation scheme also but it sends two bits of digital information a time (without the use of another carrier frequency).

DPSK QPSK and 8 PSK
Quadrature Phase Shift Keying (QPSK)/BPSK and QPSK/QPSK Waveform (Digita Modulation Techniques) [HD] - Duration: 11:02. Engineering Made Easy 57,439 views

ECE 489 Lab 1: Amplitude Modulator and Demodulator
this blog about digital communication, how to simulate code matlab for BPSK, QPSK and 8 QAM, then apply it to Rectangular pulse shaping (RPS) then simulate code matlab for Square Root Raised Cosine (SQRC) filter as pulse shaping filter and matched filter, and apply it to the system, and we found minimum number of coefficient that the loss did not exceed 0.5 db ,then we evaluate the coded ...

Lab 8 Bpsk Modulation And
Binary Phase Shift Keying (BPSK) is a type of digital modulation technique in which we are sending one bit per symbol i.e., '0' or a '1'. Hence, the bit rate and symbol rate are the same. Depending upon the message bit, we can have a phase shift of 0o or 180o with respect to a reference carrier.

BPSK Modulation and Demodulation - File Exchange - MATLAB ...
Fig 12: BPSK modulator Fig 13: BPSK modulation The basic type of modulation we selected for the design is the BPSK modulation. As mentioned in the literature survey the modulation and demodulation of the BPSK is performed according to the mentioned block diagram [8][9]. It contains a modulator; here it is performed by a switch.
