## **Insulin Glargine | Lantus® (insulin glargine injection ...**

Insulin glargine is the active ingredient in both Lantus and Basaglar. As we mentioned, it's a long-acting insulin that controls blood sugar all day. This is in contrast to rapid- and short-acting insulins that people with diabetes might take to bring blood sugar levels back to normal after a meal. Why are Lantus and Basaglar different?

## **Lantus vs. Basaglar: Are They Really the Same Insulins ...**

The recommended starting dose of Lantus ® in patients with type 2 diabetes who are not currently treated with insulin is 0.2 Units/kg or up to 10 Units once daily, adjusted to patient's appropriate FPG target. One may need to adjust the amount and timing of short- or rapid-acting insulins and dosages of any oral anti-diabetic drugs
