The Laser is a very unique boat that can accommodate many different sized sailors and abilities, due to its three interchangeable rigs. The Laser, the Radial and the Laser 4.7 all use the same hull and equipment with the exception of the lower mast and sail.

[Laser Radial Laser 4 - West Coast Sailing](#)

Most of the rigging for the Laser is done in the yard and boat house. You should only move the boat onto the dock and into the water when you are ready to sail. With a little practice you should be able to rig and be off sailing in under 15 minutes. When rigging, thoroughly inspect your equipment to make sure everything is in good working order.

A complete re-rigging of your Laser will require 15-18m of rope; more or less depending on the specific rigging systems you decide to adopt for each of the controls. Apart from wearing out, and a tendency to slip in plastic cleats, the other major disadvantage of 6mm rope is that it is hard on your hands.

Just before you put the laser in the water, check to be sure the hull plug is screwed into the drain hole in the stern. Then attach the rudder, tiller and daggerboard. Slide the rudder pins into the eyes on the backside of the laser, and make sure that the clip is holding it down. Test it by pulling up on the rudder.
