[Learning to See: Value Stream Mapping to Add Value and...](#)

If Lean is to take root in an organization, all employees need to see waste as they've never seen it before. And the most powerful process available to make waste visible is Value-Stream Mapping. Reflecting the absolutely vital nature of "seeing waste," Mike Rother's and John Shook's Shingo Award winning book on value-stream mapping is entitled, Learning to See .

[Learning to See: Value Stream Mapping to Add Value and ...](#)

Learning to See, written by Mike Rother and John Shook, is the book to read for Value Stream design. In every Lean implementation, it is important to understand the current process design and the way the design influences the flow of products through the factory.

[Learning to See: Value Stream Mapping to Add Value and ...](#)

The steps are summarized and paraphrased in the Forward (also by Womack and Jones) of Learning to See: Find a change agent (how about you?). Find a sensei (a teacher whose learning curve you can borrow). Seize (or create) a crisis to motivate action across your firm. Map the entire value stream ...

[Learning To See: Making Value Flow - lean.org](#)

Value Stream Map (VSM) • A tool used to improve a process by identifying added value and eliminating waste • A process map that follows the value creation process • "strap yourself to the product (or service) and see where you go" • A process map with data added • Times: processing, wait, cycle • Quality: number of rejects ...

Learning to See: Value Stream Mapping to Add Value and Eliminate MUDA. When organizations embark on a lean project - for many they start with Value Stream Mapping. Value stream mapping helps identify non value add processes and helps to capture and visualize an organizations information and material flows.

[sahibkarol.biz](#)

The launch of the book "Learning To See" by John Shook and Mike Rother back in 1998 gave the Lean movement the powerful method of Value Stream Mapping. This method has shown to be extremely useful in creating insight in processes by visualizing all the activities in the information flow, the physical flow and the timeline.

[Learning to See: Value Stream Mapping to Add Value and...](#)

Learning to See, a key initial step in a lean conversion, teaches you the value-stream perspective for a product family within a single facility. Seeing the Whole Value Stream, by Jim Womack and Dan Jones, extends the mapping process for product families beyond the walls of individual facilities to encompass entire value streams.

[Learning to See - lean.org](#)

Value-stream maps are the blueprints for lean transformations and Learning to See is an easy-to-read, step-by-step instruction manual that teaches this valuable tool to anyone, regardless of his or her background.

[Learning to See: Value Stream Mapping to Create Value and ...](#)

-A tool to display flow of material and information of a business process through all the steps (value creating and not) as it moves from beginning to end. -A process to align a team around a target condition, a Future State, for that value stream and plan to achieve it.

[Learning To See Value Stream](#)

The reader begins by mapping the current state of the value stream and looks for all sources of waste in the value stream. After the waste identified, a map is developed with the projected future value stream. Throughout the manual, Learning to See teaches readers the key concepts of value stream mapping.

[Value Stream Mapping Basics](#)

Value-stream maps are the blueprints for lean transformations and Learning to See is an easy-to-read, step-by-step instruction manual that teaches this valuable tool to anyone, regardless of his or her background.

[Learning To See in 2013 - The Lean Thinker](#)

Learning to See: Value Stream Mapping to Add Value and Eliminate Muda. Much more important, these simple maps - often drawn on scrap paper - showed where steps could be eliminated, flows smoothed, and pull systems introduced in order to create a truly lean value stream for each product family.

[Learning to See - M.Rother & J.Shook \(summary\) | MudaMasters](#)

The value stream mapping method was created on the basis of the Toyota's material-and information flow diagram. Firstly, this was published in Learning to See in 1999 by Mike Rother & John Shook[7]. This method's relevant aim is the reduction of the wastes through improvement of the logistics processes.
