GROUP MAY 11TH, 2018 - THIS IS THE CHOSEN TDL LINK 11 OR LINK 16 TO BE UTILISED BY ALL PARTICIPANTS DURING THE TRAINING EVENT OPERATION

Understanding Link 16

OPERATIONAL CONTEXT LPDS ensures uncoordinated Link 16 events in the sovereign and cross-border airspace of a nation is within agreed frequency limits.

SYSTEM INTEGRATION & SUPPORT

Thales can provide local in-country support to ensure that the system is designed, installed and operated efficiently.

LINK 16 PULSE DE-CONFLICTION SERVER

During the exercises, the compact, readily deployable TopLink-MINT solution from Thales was used for long-range transmission of tactical situation data to NATO and allied systems, providing an opportunity to:

- demonstrate rapid operational implementation of a Link 16 network extension capability
- validate

compliance with the JREAP standard (Joint Range Extension Application Protocol) and its interoperability with NATO and allied systems.

Thales Successfully Deploys Link 16 Satcom Capability

The recent NAWAS and CWIX exercises marked the first successful deployment by French forces of the Thales solution for long-range Link 16 transmission of tactical data via satellite. During the exercises, the compact, readily deployable TopLink-MINT solution from Thales was used for long-range transmission of tactical situation data to NATO and allied systems, providing an opportunity to:

Link 16 / Tactical Data Links Real-Time Situational Awareness Across the Battlespace In the chaos of combat, you only have seconds to identify a friend from foe before deciding whether or not to engage. And in today's conflicts, friendly fire continues to be a growing risk as warfighters need to make split-second, life-or-death decisions.

Link 16 / Tactical Data Links | Viasat

Link 16 is both the ADFs and US Department of Defence's primary TDL and is essential in enabling secure situational awareness, integrated fire control, and command and control capabilities to platforms.

Satellite Communications

A tactical data link (TDL) uses a data link standard in order to provide communication via radio waves or cable used by the U.S. armed forces and NATO nations. All military C3 systems use standardized TDL to transmit, relay and receive tactical data.. Multi-TDL network (MTN) refers to the network of similar and dissimilar TDLs integrated through gateways, translators, and correlators to bring ...

Tactical data link - Wikipedia

Link 16 is a highcapacity datalink, with frequency - hopping features and jam resistance capabilities. Links 16 uses Joint Tactical Information Distribution System (JTIDS) terminals and Multifunctional Information Distribution System (MIDS).

The Dassault Mirage 2000 is a French multirole, single-engine fourth-generation jet fighter manufactured by Dassault Aviation. It was designed in the late 1970s as a lightweight fighter to replace the Mirage III for the French Air and Space Force (Armée de l'air et de l'espace). The Mirage 2000 evolved into a multirole aircraft with several variants developed, with sales to a number of nations.
