## *Manual - CivilTech*

LPILE is a special-  
purpose program  
based on rational  
procedures for  
analyzing a pile under  
lateral loading using  
the p-y method. LPILE

# Read PDF Lpile Manual

solves the differential equation for a beam-column using nonlinear lateral load-transfer ( $p-y$ ) curves. The program computes deflection, bending moment, shear force and soil response over the length of the pile.

a. Perform LPILE analyses using the  $P_m$  value for each row position to develop load-deflection and load-moment data. b. Based on current data, it is suggested that  $P_m$  values of 0.8 be used for the lead row, 0.4 for the second row, and 0.3 for the third and subsequent rows. These recommendations are considered reasonable for center to
