~~Platelets and blood coagulation in human malaria ...~~

Malaria in humans is caused by a protozoan parasite of the genus Plasmodium, and includes the species Plasmodium falciparum, P. vivax, P. ovale, or P. malariae. Plasmodium knowlesi (thought to be previously only capable of infecting monkeys) has also recently been documented causing death in humans in South East Asia. The parasite is transmitted either via the Anopheles mosquito or from a mother ...

~~Malaria — Don't Forget The Bubbles~~

Malaria biology ¶. Malaria is a mosquito-borne disease caused by plasmodium parasites transmitted through the bite of blood-feeding Anopheles mosquitos. There are roughly 30 species of Anophelens capable of serving as malaria vectors, and only females bite (i.e. seek blood meals) to gain nutrients necessary for oviposition. After taking blood meals, females lay eggs in water sources, where ...

~~How Reliable Are Hematological Parameters in Predicting ...~~

Malaria is a major mosquito-borne public health problem in Thailand with varied haematological consequences. The study sought to elucidate the

haematological changes in people who suspected malaria infection and their possible predictive values of malaria infection. Haematological parameters of 4,985 patients, including 703 malaria-infected and 4,282 non-malaria infected, who admitted at Phop ...
