The ISO is a control within the camera that will affect the exposure. A high ISO will yield a brighter image, but it could also create a grainier, or noisy, image. For example, setting your camera to ISO 1600 will lighten the image and make it noisier. If you are using ISO 400, the images will be sharper and darker.

~~A Guide to Parked Recording with Dash Cameras~~

The master flash is the one that triggers the slave flashes. This can be an external flash just like the slave flash itself. It can also be the pop-up flash on your camera. Since the whole purpose of using a flash in slave mode is so that you can fire the light off-camera, the light from the flash on your camera can ruin the shot. How?
