Overview Euler's first law. Euler's first law states that the linear momentum of a body, p (also denoted G) is equal to the product of the mass of the body m and the velocity of its center of mass v_{cm} : $p = mv_{cm}$. Internal forces between the particles that make up a body do not contribute to changing the total momentum of the body as there is an equal and opposite force resulting in no net effect.

Professional programs - McGill University

McGill University is renowned around the world for its excellence in teaching and research-oriented programs. It has an ancient tradition of innovative studies
