~~Dabi News — MOTO POGO — one wheeled electric Motorcycle~~
I just bought a 97 KX250 and when I sit on the bike the rear shock feels like a pogostick. I turned the rebound to the slowest setting and it helped but it still feels way too springy. I have the compression set in the middle and the preload rings are wound down to the bottom. Im not sure why the...

When you squeeze the lever. On a modern motorcycle squeezing the front brake lever pushes a hydraulic piston into a cylinder which forces fluid out and through a tube that's connected to a caliper....

~~Amazon.com: Motorcycles (Pogo: How Does It Work ...~~

As the name implies, this is a condition in which the motorcycle bounces up and down like a pogo stick. The root causes are usually under-inflated tires, ineffective rebound damping (often combined with soft springs) and out of round tires.

~~New Items at the Pogo Mini Mall~~

Whether you sit in the front or the back, your seat should not bite you, make your back sore, nor make you shift forward. Your personal space and width should accommodate your size. The

driver should be able to be flat-footed. Driver's having a backrest should not be cramped or not touching. Riders come in all sizes.

~~Motorcycle Seat Hardware & Mounting Kits | Aftermarket ...~~

The motorcycle wallows and tends to run wide exiting the turn causing fading traction and loss of control. When taking a corner a speed, you experience front-end chatter, loss of traction and control. Aggressive input at speed lessons control and chassis attitude suffers. Front end fails to recover after aggressive input over bumpy surfaces.

~~Harley Twin Shock & Softail ... Ultimate Motorcycling~~

A hardtail means it has a rigid frame with no rear suspension. This was the norm up till the 40's or so. On these bikes, the saddle was sprung itself and that's how people kept from peeing blood from damaged kidneys. harley came out with the soft tail frame.

~~How to Install / Mount a Solo Springer Seat to your Harley Hardtai~~

As with a Segway, users get the Moto Pogo to move forward by leaning their body forward, and slow it down by leaning back. Gyroscopic sensors and accelerometers within the vehicle ensure that the rider stays centered above the wheel, by subtly adjusting the speed to compensate for their shifting center of mass.

~~Moto Pogo enters the one-wheeled electric scooter marketplace~~
The actual weight of the motorcycle frame, engine, and rider varies from about 500 pounds for a small woman riding a Sportster to as much as 1400 pounds for an Electra Glide (over-) loaded for a long trip with a passenger. This weight, the total weight of the motorcycle minus the unsprung weight of the two wheels, is called the sprung weight.
