Project 2013 calculates resource leveling to try to resolve resource overallocations in the project. The feature works in two ways: by

Get Free Ms Project Manual Resource Leveling

delaying a task until the overbooked resource is freed up or by splitting tasks.

Splitting a task involves (essentially) stopping it at some point, thereby freeing the resource, and then resuming it later, when [...]

Leveling Resources MS Project

In the Resource Leveling dialog box, under Leveling

your schedule so that your resources have no over allocations. Some people call this a bug, others are just afraid of it and again others can not live without it.

Finally, Resource Leveling Explained | MPUG

In its most simplistic form, resource leveling ensures that the project's resource demand does not exceed the resource

Get Free Ms Project Manual Resource Leveling

availability. When it does find an instance where the demand is greater than availability, it will attempt to correct the over-allocation primarily by changing the schedule to move tasks to a date when there is available resource capacity.
